IT SERVICES TO PROPEL YOUR BUSINESS FORWARD

ENSURE YOUR SUCCESS

You need technology to achieve your goals, to take care of your customers, and to grow your organization both remotely and in-office —our IT experts can help you make that happen.

EXCEL WITH PARTNERSHIP

The job doesn't stop when your new solutions are in place. Even after implementation, you'll need ongoing management and support, and we'll be right here providing both.

ENVISION YOUR FUTURE

Our role is to work as a proactive partner by leveraging technology, industry expertise, and strategic long-term and short-term goal setting to drive your success.

MICROSERVE SERVICES

Our experts are focused on removing obstacles and inefficiencies so you can focus on achieving success. We provide a comprehensive set of IT services and solutions. You tell us what you need, and we'll develop a custom plan that fits your organization perfectly.

MANAGED IT SERVICES

Complete proactive maintenance of your network. We understand the day-to-day of IT operations, so this includes 24×7 monitoring, updates, help desk support, and assistance with your IT solutions.

AUDIO VISUAL SOLUTIONS

Hardware and software for business communications, meeting rooms and conference rooms. This allows for seamless remote meetings, as well as Digital Signage for corporate messaging and Unified Communications support.

CLOUD SOLUTIONS

Prioritize support remote workers without affecting network performance or compromising security. Microserve works with you to provide IT hosting services, solutions and applications in a public, private, or hybrid cloud environment.

PROJECTS AND IT CONSULTING

Whatever your project — including strategic assistance with one-off projects, plans for hardware or software, or whatever you're working on — we can help. This includes everything from analysis to recommendations to implementation.

IT SECURITY

Dedicated security experts work with you to assess your security operations and vulnerabilities and recommend a course of action. We also provide cybersecurity awareness training, multi-factor authentication, managed email security and managed firewall.

DATA CENTER

IT equipment and infrastructure components that virtualize technologies. Microserve consultants work with you to assess your present infrastructure and the feasibility of a new hyper-converged solution. We can also work with you to create a tiered storage system, private cloud, and more.

BACKUP & DISASTER RECOVERY

Thorough backups of your data, both on-and off site. Microserve experts also work with you to discuss your networking environment so we can create a bounce-back plan in the wake of network downtime.

IT PROCUREMENT SERVICES

We help you select the best technology based on current industry standards and negotiate the best prices. As a Microserve customer, you have access to a custom online portal where you can order equipment based on your organization's standards and budget.

END-USER COMPUTING

End-to-end management of the client computing lifecycle, starting with procurement and continuing through configuration, inventory management, shipping, on-site setup, ongoing support, and disposal of old equipment.

MANAGED PRINT SERVICES

Complete managed print solutions, including equipment recommendations, maintenance, end user support, servicing and oversight. We'll make sure your printers and other imaging devices "just work"— every time you need them.

IT TALENT ACQUISITION

We understand that hiring top IT Talent is difficult, especially with the rise of faceless interviews and remote work. We work with you to attract, qualify, and hire the best IT professionals for your organization across all areas of technology with short and long-term requirements.

MODERN DEVICE MANAGEMENT

Modernize your devices for off-network collaboration, connection, and security. Remote device management is essential, so Microsoft's Modern Device Management concept uses cloud-based applications to enable users to be secure and productive from anywhere.
